BASIC INSTRUCTIONAL PROGRAM

The Westfield Public School system continually strives to provide the youth of the city with the best possible education; one that will lay the groundwork for an enriching and productive future. To serve the community effectively, a diversified education program is offered. To ensure that every child is provided with the basic knowledge and skills needed to achieve full potential, the Westfield School Committee has established priorities within the curriculum.

It is the policy of the Westfield School Committee that a high priority must be given to those kinds of learning which serve as a foundation for future educational development.

The priorities include: Reading/Language Arts, Mathematics, Social Studies, Science, Foreign Language, Music, Art, Health and Physical Education.

Adopted: June 20, 1998
