

Community Resources Persons/Speakers

Community resources are those individuals or groups who are invited into the schools to present supplementary information and ideas to the classroom course of student. These experiences afford students the opportunity to benefit from community viewpoints. Care should be taken in selecting these speakers so that they are individuals who respect diversity in thinking and varying views and who are not attempting to inappropriately influence points of view. The Building Administrator must approve all community resource persons/speakers, prior to the event.
